Trafficking happens throughout the state of Wisconsin; from 2013-2016 in the City of Milwaukee alone, 340 individuals (ages 25 and under) were identified as victims of sex trafficking. 231 were analyzed to get this data. Of those individuals:

- individuals were reported missing from group homes/foster care at least once: **80**
- confirmed victims of sex trafficking: **81%**
- individuals had been trafficked multiple times: **60**
- were minors at the time of the first reported incident of trafficking: **55%**
- were female: **97%**
- reported interaction with police outside of trafficking incident like DV, drug related, and missing reports: **86%**

The history of trafficked individuals were nearly identical except confirmed victims were more likely than identified victims to have a reported history of sexual victimization or being filed as a missing person.
